

EIP ON AHA

Innovation in AHA: Looking into the future!

26 February 2021

15:00 – 16:30 CET

Demographic change is one of the key challenges Europe is facing and will continue to face in the next decades, and it is essential to implement better policies, programmes, and practices to allow innovation in this field to reach the end-user. Over the next two years, the IN-4-AHA consortium wants to support the supply and demand sides in implementing scaling up strategies for innovative solutions.

In this workshop we are inviting stakeholders to learn more about the IN-4-AHA project and to discuss with us the strategic priorities going forward but, also, to reflect on past successes and lessons learnt from previous projects in this area.

Please indicate your participation [here](#).

Agenda

15:00 – 15:15 | Opening & introduction to the IN-4-AHA project

- **Piret Hirv**, Connected Health Cluster, Tehnopol Science and Business Park

15:15 – 15:55 | How EIP on AHA has evolved: lessons learnt and next steps

Moderated by **Elisio Costa**, Porto4Ageing (University of Porto) and **Valentina Polylys** (EUREGHA)

- **Carina Dantas**, SHINE 2Europe and ECHAlliance;
- **Maddalena Illario**, University of Naples Federico II;

15:55 – 16:30 | Discussion on the next steps for innovation in AHA

Moderated by **Cláudio Santos**, Porto4Ageing (University of Porto)

This project has received funding from the European Union's Horizon 2020 research and innovation programme under grant agreement No 101017603.
