#EURegionsWeek

Boost skills, embrace transformation: regions for green and digital skilling in healthcare

11 October, 14:30 – 15:30

Workshop

European Health and care systems have increasingly been transitioning towards more green and digital solutions. Skills are key factors in supporting such transformation, empowering the healthcare workforce, and creating more sustainable ecosystems. By taking stock of major EU initiatives in the field and exploring current experiences and challenges on the ground, this session will discuss the role of regions in spearheading green and digital up- and re-skilling of the healthcare ecosystem, in the framework of the European Year of Skills 2023.

European Committee
of the Regions

AGENDA

Moderator: Giovanni Gorgoni, Chair, European Regional and Local Health Authorities

Welcome

Welcoming speech

14:30

Giovanni Gorgoni, Chair, European Regional and Local Health Authorities
