

Antimicrobial Resistance in Europe and globally: setting the scene and multi-stakeholders perspective

Ariane Vander Stappen

Head of Unit for Antimicrobial Resistance and Human Nutrition
DG Sante, European Commission

EU AMR Action Plan and Council Recommendation

Targets by 2030:

- **20%** reduction in total human consumption of antibiotics
- **50%** reduction in overall EU sales of antimicrobials used for food animals
- **65%** of the total consumption of antibiotics in humans belongs to the Access group of antibiotics
- Total incidence of bloodstream infections
 - with MRSA is reduced by **15%**
 - with third generation cephalosporins-resistant E. coli is reduced by **10%**
 - with carbapenem-resistant Klebsiella pneumoniae is reduced by **5%**

Baseline: 2019

The Council

- **The Council welcomes** the Commission's intention to develop a **monitoring framework** to assess the progress and results achieved in implementing the AMR Action Plan and this Recommendation.
- **The Council encourage** Member States to develop integrated Surveillance systems for AMR and AMC, taking into account the Commission **feasibility study** on such systems

Awareness Campaign and Global Actions

Livia's Battle:

Livia, a 24-year-old literature enthusiast from the UK, discovered the serious threat of AMR

Overview of the 2024 UNGA Political Declaration:

Governance:

- Actionable national action plans in all countries
- Quadripartite to update Global Action Plan by 2026
- Establishment of an Independent Panel on Evidence for Action on AMR in 2025

Financing:

- mobilize US\$ 100 million to support at least 60% of countries to have funded NAPs

Human Health:

- At least 70% of human antibiotic use globally from WHO "Access" group

Animal Health:

- Meaningful reduction in the use of antimicrobials in the global agri-food system, Animal Vaccine Strategy by 2030
