

EUREGHA is the network of reference for regional and local health authorities in health-related issues.

Our mission is to promote collaboration amongst regional and local health authorities in Europe, within the framework of policies relating to public health and health care, as well as to establish focused collaboration with the institutions of the EU and other relevant stakeholders.

A word from Giovanni Gorgoni, EUREGHA Chair

EUREGHA is a key network for the establishment of successful partnerships between its members and relevant stakeholders, and plays an influential role at EU level, giving regional and local authorities a more powerful voice.

Active participation in EUREGHA has put many of the members at the front line and increased their engagement at the European level. EUREGHA brings together a critical mass of knowledge and expertise and encourages diversity with the purpose of helping to improve the efficiency and quality of health systems and services in Europe.

EUREGHA's objectives and tools

Advocacy

- Making the voice of regional and local health authorities heard at EU level
- Liaising with the EU institutions and international stakeholders
- Reinforcing the partnership between EUREGHA member regions and the EU institutions
- Topic-focused working groups (Cancer, Cross-Border, Digital Transformation).

Policy monitoring

- Providing access to tailored monitoring of information on health-related legislation and funding through reports, e-mails, bi-weekly InfoFlashes and bimonthly newsletters.

Profile promotion

- Production and dissemination of booklets and publications featuring EUREGHA members' best-practices
- Organising high-level events in Brussels, exclusive workshops, webinars and conferences, also in the framework of the activities of the Interregional Group on Health and Wellbeing of the Committee of the Regions.

Partnership building

- Providing opportunities for cooperation and exchange of experiences with other European regions
- Create opportunities for collaboration with other stakeholders (patients, healthcare professionals, industry, multi-stakeholders coalitions, etc.).

Project development

- Monitoring calls for proposals and tenders
- Disseminating partner searches
- Providing participation opportunities, through EUREGHA, in EU projects and initiatives.

We look forward to welcoming you to EUREGHA!
