

LOOKING AHEAD- INITIATIVES PUSHING FOR CHANGE

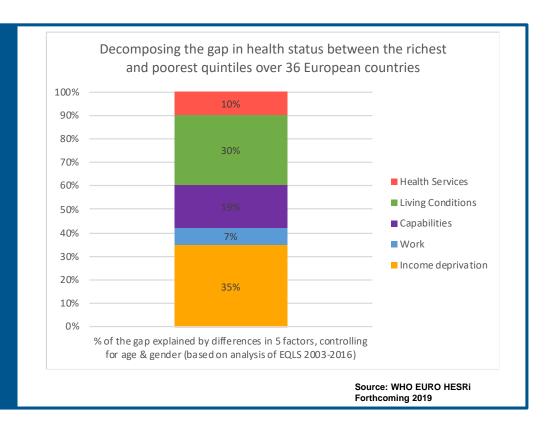

Tatjana Buzeti, Policy Officer, Multi sectoral Approaches for Health Equity WHO European Office for Investment for Health and Development

What's behind current health inequities in European countries

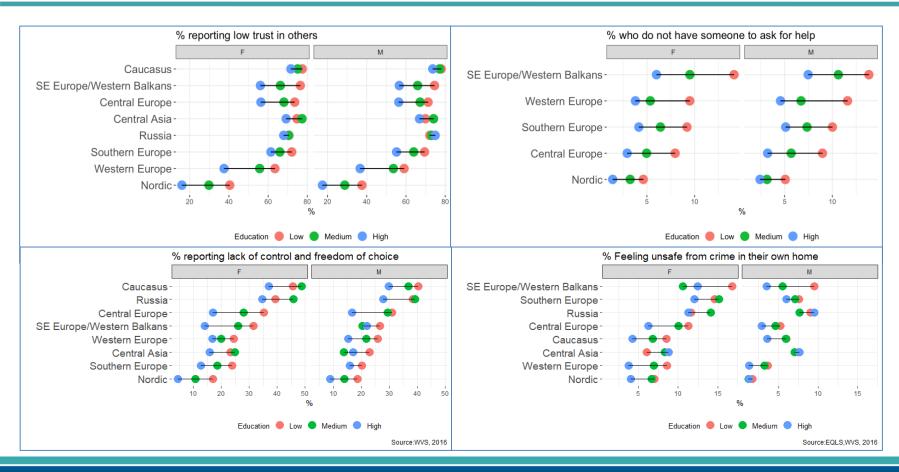

- 1. Income insecurity 'not being able to make ends meet'
- 2. Poor quality housing and neighbourhood environment
- 3. Higher levels of social exclusion in more disadvantaged groups
- 4. Inequity in access to health care
- 5. Lack of work and poor working conditions

- impoverishment caused by out-ofpocket health spending affects up to 15% of households in countries of the European Region
- Income & employment insecurity and worries over making- ends meet explain 42% of the inequity gaps in mental health within European countries

Creating the conditions for equally healthy lives for All

Sense of belonging and place, along with insecure neighbourhoods and housing tenure explain 49% of the gap in poor health between top and bottom income quintiles within countries

Building safe and resilient communities needs to be at the heart of strategies for accelerating progress towards health and prosperity for

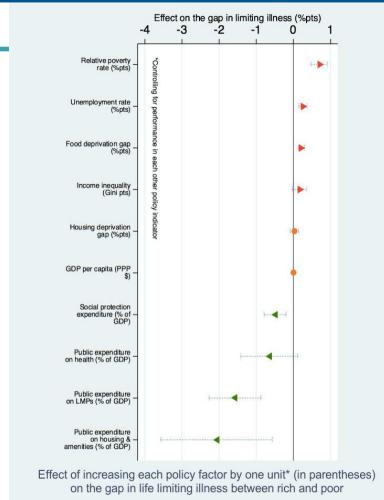

Healthier Prosperous Lives for All

The forthcoming WHO European Health Equity Status
Report - a roadmap for action for healthier prosperous

- ✓ Better design and investment in multisectoral policies addressing social, economic, environmental and commercial determinants with impact on the places where people are born, live and work.
- ✓ Increases in investments in multisectoral policies are associated with a narrowing of the gaps in wellbeing, life-limiting illness and mental health, over a period of 2–6 years between the poorest and richest quintiles within countries across the Region.

Policy options
for narrowing the
inequity gap in
life limiting illness

The effects of Increasing investment in 4 Policy Areas over a 4-6 year period

all

lives for all

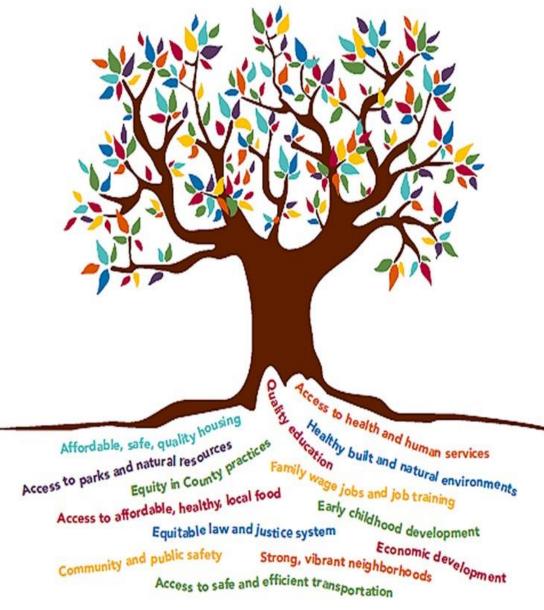

The WHO Regional Health Equity Solutions Platform

- healthy prosperous lives for all

A partnership Initiative led by the WHO European Office for Investment for Health & Development

A collaborative space to generate know-how and dynamic so for governments and wider actors in society on how to

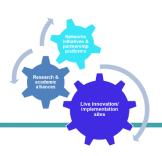

- √ address key health and equity challenges,
- ✓ invest in a sustainable, fair and smart solutions,
- ✓ bring social values into an inclusive economic growth poli
- ✓ and in this way improve health and wellbeing for all.

Example

THE HS ECONOMIC AND SOCIAL 'FOOTPRINT' INITIATIVE

The Challenge . . .

- Shift the thinking away from HS being seen as only a cost, and ensure HS are defined by their net contribution to society in terms of economic and social progress.
- Prevent disinvestment in health, and ultimately strengthening HS role in national and local decision making.
- Show how HS can be 'drivers' of inclusive and sustainable regions and communities by addressing the determinants of health and improving the conditions needed for all to live healthier prosperous lives

Countries: England, Finland, Italy, Macedonia, Romania, Scotland, Slovenia, Sweden.

Alliances Foundation (UK), WHO EURO & HQ (CPH & GVA),

RETHINKING HOW WE PURCHASE, EMPLOY AND USE OUR LAND AND ASSETS

for sustainable development, inclusive growth and community health and wealth building for all

- Impacts on wellbeing and life opportunities
- Impacts on economic & social resilience

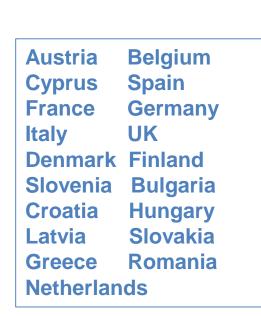

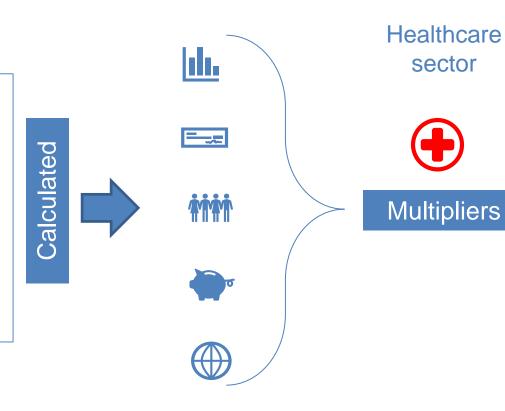

New research, methodology and country/ regional reports

19 EU countries with available comparable data

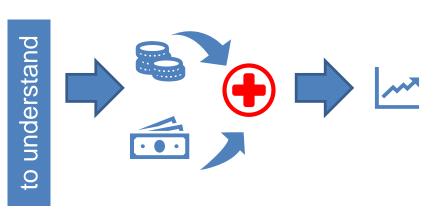

2010 IOT only, only year countries have complete data.

IOT with 62 singular economic sectors, Eurostat database.

How changes in demand and investment in healthcare sector affect all related sectors of economy

Networks

✓ Regions for Health Network
41 Regions, 27 countries, 131 million people

- ✓ Small Countries Initiative 3 EU, 5 non-EU countries
- ✓ Nordic & Baltic Health Equity & Social Determinants Collaboration

8 countries, 33 million people

The Venice Office manages 3 policy-networks with an extensive reach to decision-makers, politicians, and practitioners across the WHO European Region

The networks are key partners in

piloting, adaptation and diffusion of the evidence, and best practices in improving health and reducing inequities.

The networks play an important feedback and agenda setting role by

- bringing to the surface social and economic trends (challenges and opportunities),
- analysing their future impact on health equity & wellbeing &
- ✓ identifying effective responses for improving health and health equity.
